Respecting the relies of porcelain ware found in the late exhumations at Herculaneum, which have been forwarded to the Society of Antiquities in London, whereof your correspondent says the bottle resembling Drake's Plantatation. Bitters was undoubtedly placed amount the ruins by the agent of Dr. Drake, we desire to state he is incorrect in every respect. If a bottle was found there bearing our lettering, the language of the Aneient Romans was different from the accepted literature of that day. Our Agent has other business than this in Europe, and has not been in Italy at all. No doubt Americans carry Plantation Bitters to Reme; but trying to impose upon a society of Antiquarians in this way, seems quito uncleas, and we do not appreciate the joke. It is unnecessary for us to spend money in Europe while we are unable to supply the demand for these celebrated Bitters here. Respectfully,
